PRODUCT DESCRIPTION

Expand the functionality of your Provi-Dock docking trolley with the 'Vari Med' power strip. It was developed to meet the highest demands and offers numerous advantages. The robust aluminium construction ensures durability and protects the socket outlet from external influences. The rounded corners minimise the risk of injury and ensure safe handling, even in hectic situations. A special feature is the protective cover, which locks automatically and can only be opened again with tools. This ensures that the connected devices are constantly supplied with power, guaranteeing uninterrupted patient care.
